

STUBBLE MASTER 530 HD

Commonly known as the “beefed up 500”, that’s not far off. A harder wearing design, it has a Hardox steel deck and a 225HP driveline (compared to 165HP). Everything about this compact machine is incredibly robust.

Radial tyres take challenging terrain in their stride, ensuring a smoother ride. Meanwhile a larger axle and drawbar make the 530 a tough little Stubble Master.

Grass seed farms welcome our high-end machines. When you’re intensively cutting three times a year, every efficiency counts.

- ▶ A heavy-duty, compact machine.
- ▶ 225HP gearbox for additional power.
- ▶ Hard wearing specification.
